Letter of Recommendation

It gives me an immense pleasure to recommend Mr. Anish Nesarkar for graduate studies at your esteemed university. As an associate professor in Computer Science Department, PES Institute of Technology, Bangalore, I have known Anish for over 2 years. Apart from being in Electronics and Communication Engineering major course, Anish has displayed profound interest in Computer Science Engineering Department. I have taught him various subjects, including Data Structures (Semester 4) and Design and Analysis of Algorithms (Semester 5). I would place Anish among the top 10 percentile of all the students whom I have taught.

Anish is a sincere and hardworking student with unparalleled self-drive to excel in his chosen field of studies. He has been consistent in his academic performance, retaining his class rank in top 10 percentile throughout his undergraduate program. His performance in subjects such as Algorithms and hard-core programming were exemplary, demonstrating his keen interest in these topics. His ability to ask the right questions and conducting his own research and studies outside of the classroom not only helped facilitate enriching discussions in the class but also reflected his potential for research.His performance in laboratory work was always good and he secured 'A' grades in his Data Structures and Algorithm Analysis assignments.

It gives me immense pleasure to see Anish apply the concepts of Data Structures and Algorithms learned in my class in his various projects. He is able to program microcontroller very efficiently by optimising the speed and task of the microcontroller. This clearly demonstrated the fact that he has been in the finals of Robotics e-yantra competition hosted by IIT Bombay. Apart from studying minor courses in Computer Science Department, Anish has also participated in the 2-Day workshop on Data Analytics organized by the Department of Computer Science and Engineering, PESIT and sponsored by TEQIP II.

Anish high scores in practical exams and his inquisitiveness indicate his attitude towards research work. He can execute research work in his field with judicious planning. His perseverance during laboratory work is noteworthy and I strongly believe that he is very capable of succeeding in any research endeavour he undertakes. I concur with his decisions to pursue graduate studies and strongly recommend him for admission at your university.

V R Badri Prasad
